

REEL PLAYBOOK

The idea in one line: every reel names ONE problem a driver is having right now, shows you fixing it, and sends them to the link in bio — where the website turns them into a WhatsApp booking with their car's details already filled in. How to film it, script by script.

Prepared by Stalin · For Jitty · August 2026

THE FORMULA

ANATOMY OF A 30-SECOND REEL

0-2 s

Hook — say the symptom to camera. First words name the problem the viewer has: “ABS light flashing while you drive?” Nothing else opens the video.

3-10 s

What it means. One or two sentences — what's probably wrong and why leaving it costs more later. Plain words, no jargon.

10-25 s

Show the fix. Real footage: the car on the hoist, the worn part next to the new one, the scanner reading. Your workshop is the proof.

25-30 s

The same CTA, every time. Word for word — see the black box below.

One video = ONE symptom. Never list five problems in one reel — the person with the ABS light needs to feel like this video was made for them.

READY TO SHOOT

TEN SCRIPTS — FILM STRAIGHT OFF THIS LIST

01

“ABS LIGHT FLASHING WHILE YOU DRIVE?”

Say: that light means the system that stops you skidding is off duty. Usually a sensor — cheap to check, dangerous to ignore in the wet.

Show: the scanner pulling the fault code, the wheel sensor.

Sells: diagnostics — a real customer already booked from this exact problem

02

“BRAKES SQUEALING WHEN YOU SLOW DOWN?”

Say: that squeal is the wear indicator — the pad telling you it's nearly gone. Catch it now and it's pads; leave it and it's discs too.

Show: worn pad next to a new one — the visual sells itself.

Sells: brake inspection / Standard Service

03

“CAR PULLING TO ONE SIDE ON THE HIGHWAY?”

Say: could be alignment, could be a tyre, could be a brake dragging. Ten minutes on the hoist tells us which.

Show: steering wheel held straight while the car drifts; alignment rig.

Sells: steering & alignment

04

“ENGINE STALLS RIGHT AFTER STARTING?”

Say: you already made this thumbnail — this is the video version. Cold-start stall is usually air, fuel or an earthing issue. Don't keep cranking it to death.

Show: the stall happening, then the scanner.

Sells: diagnostics & mechanical repairs

05

“TEMPERATURE NEEDLE CREEPING UP IN TRAFFIC?”

Say: overheating kills engines — one warped head costs more than ten cooling repairs. It's usually the fan, thermostat or a slow leak.

Show: coolant pressure test, the stained radiator.

Sells: radiator & cooling

“AIRCON BLOWING WARM THIS SUMMER?”

06

Say: nine times out of ten it's low gas from a slow leak. A regas with a dye test finds the leak instead of masking it.

Show: the gauges hooked up, vent thermometer before/after.

Sells: air conditioning — post in spring, pin all summer

“CLUNK OVER EVERY SPEED BUMP?”

07

Say: that knock is usually a sway-bar link or bush — small parts that make the whole car feel old. Cheap fix, instant difference.

Show: shaking the worn link by hand on the hoist.

Sells: suspension

“CAR SLOW TO CRANK IN THE MORNING?”

08

Say: batteries don't die suddenly — they warn you for weeks. A two-minute test tells you if it's the battery, the alternator, or a drain.

Show: the battery tester verdict printing.

Sells: battery test / Standard Service

“OIL SPOTS ON THE DRIVEWAY?”

09

Say: a leak is the engine telling you where it hurts. Finding it early is a gasket; finding it late is an engine.

Show: UV dye tracing the leak line.

Sells: servicing & repairs

“DIESEL BLOWING BLACK SMOKE — OR THE DPF LIGHT'S ON?”

10

Say: short trips clog diesels. A forced regen or clean now beats a \$4,000 filter later.

Show: the sooty tailpipe, the regen running on the scanner.

Sells: diesel & DPF

THE CLOSE

SAME CTA, WORD FOR WORD, EVERY REEL

“IF THAT'S YOUR CAR — LINK IN BIO, TAP ‘ISSUES WITH MY CAR’, TELL US WHAT'S WRONG, AND WE'LL SORT IT.”

Say it to camera AND put it as text on screen for the last 3 seconds. Repetition is the point — followers should be able to finish the sentence for you. That's when it's working.

Caption ending, every post: “📍 6 Lolands Rd, Salisbury Plain · ⭐ 5.0 on Google · Book: link in bio”. When you share the same reel to the Facebook community groups, paste the special group link Stalin gave you instead — it lets us see exactly which group sends customers.
